Notice To Fishermen

First Published: 11 September 2014 | Latest Update: 11 September 2014

Fishing Hazard – Possible UXO

During a recent survey of the pipeline, approximately 35 Km from its landfall in Firth's Voe on Mainland Shetland, an object has been sighted in close proximity to the pipeline which is currently not identified and is being treated as a potential item of unexploded ordnance (UXO).

TAQA is currently working with its incumbent UXO Disposal experts to positively identify the object, and meantime wish to alert fishermen to the object, and request that they avoid the object's location. The object is located in approx. 143 metres of water.

Position: 60°35.117'N 000°37.450'W

BG Knarr Project – Bundle Tow Notification

The Knarr field is located in block 34/3 in the North Tampen region of the Norwegian Sector of the Northern North Sea at an approximate water depth of 410m. The Knarr field is set at latitude 61° 48'N and longitude 2° 47'E

The main component of the subsea installation will be a 42" Outside Diameter pipeline bundle from the proposed FPSO turret position WNW to the production template centre within the knarr field complex.

Activity

The tow of the pipeline bundle will take place from Sinclair's Bay north of Wick to the Knarr field. The total length of the tow configuration including bundle and tow vessels will be approximately 5.0 km. A typical configuration for a bundle of 5.0 km long has the towheads at approximately 45m and the 'belly' at approximately 55m depth, with a speed of approx 5.0 kts.

Fife, Fergus, Flora, Angus Fields – Over Trawl, Environmental ROTV Surveys

Overtrawl trials in the FFFA area are complete and clearance certificate has been issued by SFF. However, during these trials the sweep vessel encountered a severe snag 250m east of the 500m safety zone at the Fife location.

There are two tubular items estimated between 15 and 30 m long x 3 and 4 m diameter and between 30 and 40 mts in weight. The debris has been confirmed as non-Hess related and there are no plans for recovery of these items, therefore beware of the trawl hazard that they represent. An advisory 250m radius safety zone is recommended, centred on:

Brodgar H3 – Construction Works

Please be advised that subsea construction of the Brodgar H3 Project is scheduled to start mid October 2014. Construction work should be complete by mid January 2015.

All work will take place within the existing 500m safety zone centered on the Brodgar subsea manifold. The Brodgar H3 well is located approximately 200m to the east of the existing manifold and will be tied back using a number of flexible flowlines and control umbilicals. Coordinates for the existing manifold and new well are provided below

Montrose BLP Project – Development Operations

Please be advised that marine construction for the Montrose BLP Project is planned to take place during phase one from 1 June 2014 to 30 September 2014. Please keep clear of activity locations and construction corridors during this period.

The works will predominantly take place within or close to the Montrose 500m Zone although will also extend along a 10km corridor between Montrose and the Cayley Drill Centre, including to prepare crossing points over the 44" Langed and 24" Gael pipelines. This phase of work involves route survey activities, crossing construction, saturation diving, flotel and heavy lift operations. Planned vessel campaigns include:

- Rock placement at crossings: Sep/Oct
- Mattress installation at crossing August/Sept
- Saturation diving at Montrose 500m Zone (DSV Seven Pelican): Sep

Phase two of the works will take place in the period Oct – Dec 2014 and will involve the installation of new pipeline bundles along the 10km corridor between Montrose and the Cayley Drill Centre.

Cygnus Field – Development Operations

GDF Suez E&P Ltd is developing the Cygnus Field in Block 44/11a & 44/12a of the Southern North Sea. The development is centred on 3 fixed bridge-linked platforms which comprise the Cygnus Alpha Complex. There is also an additional satellite platform, Bravo Well-Head BWHP. An infield pipeline links the Bravo satellite to the Alpha Complex and product is ultimately exported via the ETS Pipeline system. The installation phase is segregated into two offshore campaigns 2014 and 2015.

In the coming month the following works are planned:

Subsea Pipelines

- Harkand ISS DSV Da Vinci on location at Alpha carrying out spoolpiece metrology, mattress installation and relocation of wet stored spoolpieces.
- DSV will then relocate to Bravo (circa Friday 29th Aug) to install mattresses before transiting to WYE location on Sat 30th Aug to install roof panels, install mattresses and recover spoolpieces. DSV demob circa 2nd Sept.
- There are three anomalies on the 24" pipeline which need to be corrected at the following locations:
Soil berm # 001 – KP31 54°24.430'N 001°54.040'E 1.4 above mean seabed.
Soil berm # 002 – KP44 54°19.880'N 001°45.012'E 1.4 above mean seabed.

- 3 x guard vessels (Rachael S, Floreat and the Copious) are currently located infield along the 24" pipeline providing protection (1 located at the Alpha Complex, the Pipeline Crossing and the Wye Manifold).

Drilling

- Interface works are currently being performed between the Ensco 80 drill-rig and the Alpha WHP.
- Piling operations will begin from the Ensco 80 circa 29th August 2014.

The associated umbilical's have been removed and the pipelines have been buried apart from a couple of minor pipeline crown exposures in trenches that we will be monitoring over the coming years.

Where the pipeline ends were lowered but remained exposed in the open trenched 6m x 3m link lock mattresses were placed over those ends. The pipelines have been purged clean and are cut at the ends so are now deemed as "disused". There are no plans to re-use those pipelines.

Notice to Fishermen

First Published: 19 December 2013 | **Latest Update: 13 June 2014**

Fishing Hazard – Exposed Subsea Cable, Beam Trawl and Wire

Please be advised that, following entanglement with a subsea cable, a beam trawl and scallop gear have been discarded at the position below. The fishing gear is entangled with the subsea cable and poses a significant hazard to fishing (L: 10m x H: 2m). There is also over 80m of exposed cable in the vicinity, due to the trawl dragging the cable from its original position. Please exercise extreme caution whilst fishing in this area.

Seabed Obstruction at the following position: 55°22.911'N 06°35.914'W

An incident of a fishing vessel snagging his gear on a subsea cable (Hibernia Atlantic) approximately ten nautical miles off the Northern Ireland coast.

The position given by the fishing vessel is: 55°22.915'N 06°35.917'W

It was advised that the fishermen cut away both sides of his fishing gear and up to 200 fathoms of wire rope.

An awareness chart of the area is available from: Steven Bennett, Global Marine, email: Steven.bennett@globalmarinesystems.com

Western Isles 210/24a – Anchor Piles and Chains Installation

Dana's Western Isles Development will commence the Anchor Piles and Chains Installation at the start of July. The 12 anchor piles should be flush with the seabed or below but the attached chains, approximately 210m in length, will lie on the seabed. There will be a sub-surface buoy on the rigging at the FPSO end of each of the 12 ground chains. A survey will be carried out at the end of the installation which should take around 30 days
