### Denmark / Norway – Current Profiler

**An Aquadopp Current Profiler was deployed in support of SNT03\_15. Intentions are to leave the Aquadopp in position for at least 29 days, with recovery occurring no later than 9 July 2015.**

The current profiler set up consists of 2 x 110Kg sinkers, with a 2m length of rope attached to a lightweight release transponder. This is attached to a 2m length of rope which is then attached to a large yellow 'buoy' which houses the current profiler. The current profiler was deployed in a depth of 54m and was weighted to the seabed so that it sits approximately 6m above the seabed.

This does not pose a danger to surface navigation but may present a snagging hazard to fishing gear. We have submitted an H-Note as standard.
