New Marine Licence for Marine Aggregate Dredging – (Area 510/2)

On behalf of CEMEX UK Marine Limited, this is to advise that a Marine Licence for marine aggregate dredging has recently been issued by the Marine Management Organisation (MMO) for Area 510/2 in the Outer Thames Estuary.

It is anticipated that operations will commence on or after 23rd July 2015 and the duration of the Licence is 15 years.

As required by the Fisheries Code of Practice, Masters of Dredging vessels will call up on VHF 16 when approaching the dredging area at a range of 10nm (approximately 1 hour before operations are to commence) and will provide an estimated time of arrival on the area and position of operation. A VHF working channel will be established between the dredger and fishing vessel(s) if required.

Marine Aggregate Survey Notification – Outer Thames Estuary Obstruction

Please be advised that during the ongoing regional seabed monitoring survey works for the marine aggregate industry a benthic grab was lost at the position:

51°49.764'N 01°32.306'E

The benthic grab consists of a large steel bucket held within a solid 1 m3 support frame This grab was lost with a short length of steel cable attached to it. It was unclear if the grab was caught on the seabed at the time of loss or if there was a cable failure as such it is unknown if this obstruction is fixed/caught on the seabed.

At this time there are no plans to recover this obstruction. Should an attempt to recover this grab be made then advanced notification will be given. This notification is intended for circulation to all interested parties undertaking activities in the vicinity of the obstruction. If you would like further details regarding this matter please contact the RSMP Coordinator or the Fishing Liaison representative using the contact details at the head of this communication.

For further information, please contact: **Phil Latto, Marine Space, Tel: +44(0)2380 381945, Email: phil.latto@marinespace.co.uk**

Notice to Fishermen

First Published: 02 July 2015 | Latest Update: 02 July 2015

Marine Aggregate Notification – East Sussex Obstruction

Please be advised that during the ongoing regional seabed monitoring survey works for the marine aggregate industry a benthic grab was lost at the position: 50°36.504'N 00°15.822' E

This benthic grab is large and heavy enough to act as an obstruction on the seabed, potentially causing damage to towed fishing gear. The benthic grab consists of a large steel bucket held within a solid 1 m3 support frame. This grab was lost with approximately 50 m of steel cable attached to it.

It was unclear if the grab was caught on the seabed at the time of loss or if there was a cable failure as such it is unknown if this obstruction is fixed/caught on the seabed. At this time there are no plans to recover this obstruction. Should an attempt to recover this grab be made then advanced notification will be given.
