Johan Sverdrup Field – Temporary Exclusion zone

The initial installation at the Johan Sverdrup field at NCS will take place during Summer 2015. The water depth at the location is 113 m.

A pre-drilling template with 2 docking piles, each of 15 meters, will be installed at the location for the future Johan Sverdrup Drilling Platform. A Statutory Instrument (SI) is therefore created to offer protection to/ from users of the sea.

In this case an exclusion zone is granted by Norwegian Authorities, so normal navigation through the area may not be acceptable, and it is – as for safety zones - deemed illegal to conduct fishing activity within the zone. The zone is established from 7th of August 2015.

The coordinates for the template are: 58°50.123'N 02°33.119'E

The zone will have a radius of 500m
