1 x drilling template structure at Burgman drill centre	56°44.592'N 00°40.700'E

Please note: Each drill centre has an approved HSE 500m safety exclusion zone in force.

Early May and into June installation of three (3) 3.5km pipeline bundles will be undertaken, towing each of the bundles from Sinclair's Bay north of Wick to the Catcher, Burgman and Varadero fields. Also in early May and into June installation of twelve (12) piled anchors with chain and wire mooring legs (in 3 groups of 4 mooring legs) shall be undertaken by the construction vessels Skandi Skansen and Skandi Neptune working around and extending out approximately 1000m from the future Catcher FPSO location. Installation of the FPSO Submerged Turret Production (STP) buoy and risers will commence later in the summer.

Drilling

The ENSCO 100 Heavy Duty Jack Up drilling rig is currently located at the Catcher drill centre where it is expected to conduct drilling operations until mid-April 2016. In a change from outline plans previously provided, an additional exploration well (Laverda/Slough) has been included in the drilling schedule from Mid-April 2016.

Five seabed oceanographic instruments are to be deployed off the Suffolk Coast during January 2016 and will remain in place until 31st May 2016.

The instruments will be indicated by a surface buoy with a light (Gp Fl. (5) Y 20s). The instrument may be up to 200m from the buoy with ground tackle on the seabed between them. A wide berth of 500m around the buoys is requested.

Rig anchors may extend over one mile from rig positions; anchor buoys are not always deployed. There may be additional structures called anchor pennants, deployed up to 200 metres from each anchor. In the interests of safety and to avoid fishing gear damage, fishing close to, or within anchor patterns, should be avoided. Fishermen may contact the installation or the ERRV (standby vessel) for positions of the anchors.
